Walking Space Robby's Instruction

The story of the Robby
Where did I come from?

Hi everybody! My name is "Robby". I came from a magical planet, which is far away, and its name is "Happy Star". On the Happy Star, I got many friends. We all have silver skin, big twinkling eyes, and a small mouth. In our planet, there is nothing else except happiness.

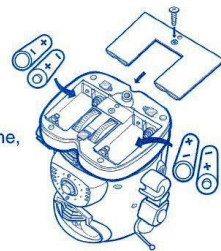

However, at an early date, our planet had gone out of the normal track and moving towards the sun. So, we must leave our home and escape to the nearest planet, which is the earth. I have lost my family during this disaster. I really miss my family, my friends, and my planet very much; even I know it will disappear very soon. I hope I can find them on the earth. Therefore, I really need your help. Please help me to find them and start my new life here.

1. Before you play with me

Before you play with me you have to install my Batteries and then give me a big hug! Make sure you have an adult help you. To install my batteries, unscrew the battery door And open it. Insert 4 x AA Batteries (not included). Attach the battery door.

2. To ensure proper function

Do not mix old and new batteries, and do not mix alkaline, Standard or rechargeable batteries.
An adult should do Battery installation.
Only batteries of the same or equivalent types as recommended are to be used.

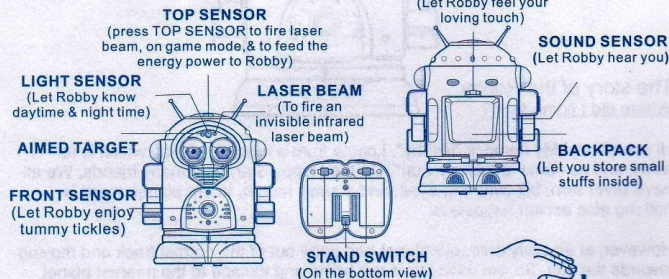

3. How to shut down

If you want to shut Robby down, simply remove his batteries. He will not respond to anything. He will not wake up until he is lifted. If you will be away from Robby for a long time, you can remove his batteries to switch him off. But do not remove his batteries regularly.

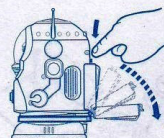

4. Getting to know Robby

Robbys are very sensitive. He knows if someone pets him, tickles his tummy, covers him eyes, picks him up, hugs him, makes loud noises, or plays music. Robbys can see and is very sensitive to light.

1) If you want to fire an invisible infrared laser beam press his **TOP SENSOR** while you play laser fighting game.

2) Also you can feed Robby the energy power by press his **TOP SENSOR** when Robby feel hungry.

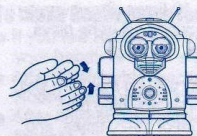

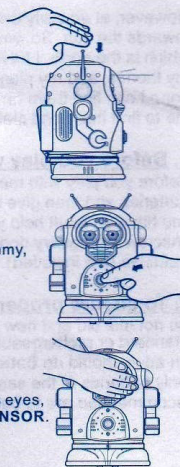

3) If you want store small stuffs into Robby, open the **BACKPACK** on the back side of Robby.

4) If you want to tickle Robby tummy, press his **FRONT SENSOR**. He is very ticklish.

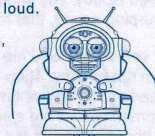

5) If you want to pet Robby, press his **BACK SENSOR**. He love having his back pressed.

6) If you want Robby to close his eyes, put your hand over **LIGHT SENSOR**. He is not afraid of the dark.

7) If you want to see if Robby is listening, clap your hands or make a loud sound, not too loud.

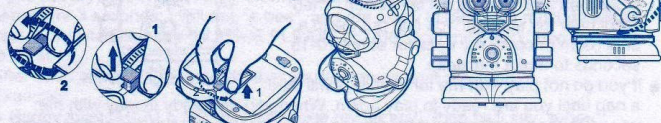

8) If you want to give Robby a hug, pick him up. He love hugs.

9) Pls note the Robby can scan with his sparking head's life when he is in stand-by.

10) Also his mouth & ears will be twinkling, and he can wiggle his antenna & move hands when the Robby is speaking & acting.

11) To pull up and turn around the 3 stand switches on the bottom if you want Robby in stand type without walking.

5. Playing together

When we first meet, I'll speak "Robbish". It is a language common to all Robby. I like to be held, petted and tickled. You can pet my tummy, rub my back, and play with me. I can hear you when you clap your hands. I know you are in front of me if you wave your hand in front of my eyes. More you play with me, I begin to be able to speak in your language.

6. Watch me grow up

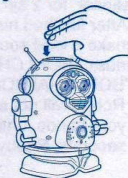

Go through four stages of development.

1. The first stage is when you meet me. I am playful and want to get to know you.
2. The second and the third stages of development are transition stages when I begin to be able to speak in your language. I'll learn your language through our conversations.
3. The fourth stage is my mature stage when I speak in your language more often but I'll also use Robbish. Within this stage, I'll be able to talk to you.

7. How to figure out what I need

At various times, I will require a certain kind of attention from you. Just like you, I am very good at letting people know what I need. When I am hungry, I'll say "hungry" and let you feed me the energy power by press my top sensor. After that, I'll say "man man" so you know I'm eating.

If you don't feed me when I get hungry, I will not want to play with anyone until you feed me.

As you feed Robby, he may say "man man", which means that he want more energy power.

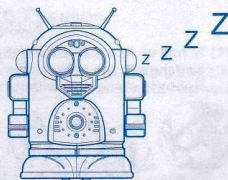

Tips: When a Robby is hungry, he will usually want to eat 6 to 10 times. So when you feed Robby, you should give him 6 to 10 feedings. When he sounds full or he plays burping sound, that means he is full and ready to play with you.

If you do not feed me I will begin to get sick and coughing. I will tell you that I am sick, I'm not healthy. Then I will not want to play and will not respond to anything but feeding. If you want me to get well, you need to feed a minimum of 10-20 times, and sometimes let me sleep for a while.

After I have been fed 10-20 times, I will begin to feel better, but to nurse me back to complete healthy, you will have to play with me.

8. Sleep

- When I feel tired or no one play with me for more than 2~8 minutes, I'll fall asleep. Then you'll hear my snoring. You can put me in a dark room or cover my eyes for about 10-15 seconds to make me sleep.
- If you do not play with me for a while, I will take a nap until you are ready to play again. When you are ready to play with me, you will have to wake me up by picking me up, tickling my tummy, and pressing my back sensor until I wake up.
- Don't wake him up immediately after he fell asleep.

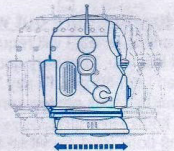

9. Games

- If you play more with me, I'll learn your language quicker and grow up healthy.
- Other than talk with me, there are many ways that can make me learn your language.
- You can create a new game and play with me. Or we can play the games that I already knew.

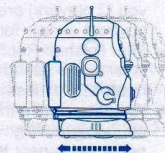

Robby Dancing

- If you like to see Robby dancing, clap your hands or make a loud sound.
- After finished his reaction then press & hold down back sensor for 2 seconds.
- After finished his reaction then clap your hands or make a loud sound again, Robby start dancing & play music "BON! CHA! BON-CHA-CHA! " "BON! CHA! BON-CHA-CHA".
- Robby will not stop dancing, if you keep on clapping your hands, until you stop clapping hands & for 30 seconds, Robby will go back to normal situation.

To make Robby move forward & turn around by sonic & light control

- If you like Robby moving forward & turn around, clap your hands or make a loud sound to trigger Robby acting.
- After finished his reaction, clap your hands again to make Robby into sonic & light sensor control mode.
- After finished his reaction, you can make Robby move forward 40~50 cm by sonic control (clap your hands) or make Robby turn around by light control (to cover Robby's light sensor).
- The Robby will go back to normal condition if you did not clap your hands or cover Robby's light sensor in 30 seconds.

To Follow Robby says

If you pet my tummy, after finished my reaction then press and hold down my back sensor for 3 seconds, I will say "a-bee", and am ready to play. You must do what I said. For instance, I say "HUG ME PLEASE AGAIN" (pet my back), then you have to do so.

After each action, I'll tell you whether you've done it right or wrong.

Example:

- Robby says "TICKLE ME AGAIN" (tickle my tummy), then he'll say "a-bee".
- Robby says "HUG ME PLEASE AGAIN" (press my back sensor) then he'll say "a-bee".
- Robby says "I'M SLEEPY AGAIN" (cover my eyes), then he'll say "a-bee".
- Robby says "LET'S DANCE OK ! " (to make a loud sound by clapping your hands), then he'll say "a-bee".

When you got these signals, you know you've done the right thing.

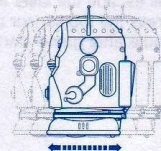

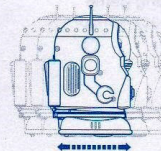

If you did all the four actions right, Robby will be very happy, even dance.

Afterward, Robby will add a new action each time. If you do not do the pattern correctly, or you do not have any action within 30 seconds then and you have to start again a new pattern.

How to make 2 Robbys sing & dance together

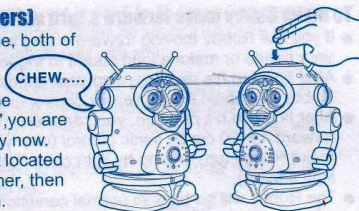

It's a wonderful thing to watch 2 Robby sing & dance together

- Put 2 Robbys face to face for 30~40 cm.
- Press and hold down one of their top sensor for 3~4 seconds.
- Pls release your hand upon Robby reaction.
- Then you can watch them singing & dancing together.

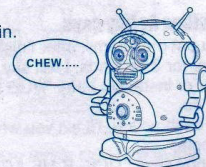

Play laser fighting game (for 2 players)

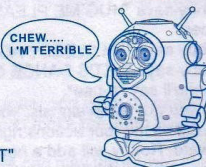

- If you like to play laser fighting game, both of you (2 players) press & hold down his front sensor for 3 seconds.
- After finished Robby's reaction & the laser beam sound "Piu ! Piu Piu !", you are ready to play laser fighting game by now.
- You have to aim the Robby's target located on the right of light sensor each other, then press top sensor to fire laser beam.
- Normally Robby is used to have 10 units to fire on every time, after finished 10 units, press back sensor to refill the laser fuel of 10 units again.
- Effective range : 2 ~ 7 meters .

- The Robby will play "CHEW....." whenever you shoot down the target.

- The Robby will play "CHEW....." And speak out "I'M TERRIBLE" if he was shot down 4 times continuously.

- The Robby will shout "AHO——!" And "I'M SHOT" if he was shot down 5 times continuously, means he lose the game, and game over.

- The loser can re-set the fighting game by press & hold down the front sensor for 3 seconds again.
- The Robby will escape the laser fighting game if you didn't press the top sensor or back sensor within one minute after game starting.

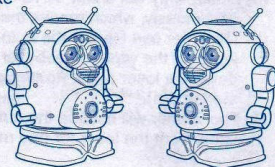

How to set 2 Robbys auto laser fighting game

If you are getting tired for manual laser fighting game, you may change to set 2 Robbys into auto laser fighting game as follow :

- Put 2 Robbys in front of each other for 30 cm.
- Cover one of their light sensor, and make Robby act.
- After finished his reaction, press and hold down back sensor for 3~4 seconds, then he will play laser beam sound "Piu ! Piu Piu !" and into auto laser fighting game.
- The other Robby also plays laser beam sound "Piu ! Piu Piu !" and into auto laser fighting game upon triggered by the previous Robby's infrared signal & " Piu Piu !" Sound.
- Then you can take apart the 2 Robbys, and let them face to face 1~2 meters away from each other. By now they start playing auto laser fighting game :
 - (1) Both of them can make auto fire by themself.
 - (2) They will move forward stright, and turn around automatically.
 - (3) They also plays "CHEW....." Sound whenever they were shot by the other.
 - (4) They also play "CHEW....." Sound and speak out "I'm Terrible" if they were shot down 4 times continuously.
 - (5) Finally they will shout "AHO——!" And "I'M SHOT" if they were shot down 5 times continuously, which means they lost the game, and the game is over.
 - (6) The loser can Re-Set the auto laser fighting game, and put the loser-Robby in frot of the winner-Robby for 20~30 cm, then let the winner-Robby shoot down the loser again (to trigger the loser into auto laser fighting game, and start again).
 - (7) The winner will escape the auto laser fighting game if he did not received any signal from the loser for one minutes.

10. Communications between Robbys

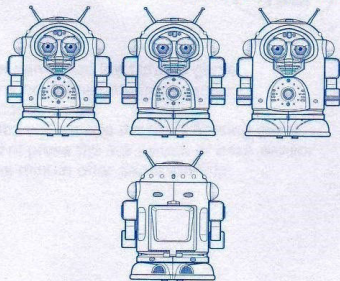

- Watching one Robby talk to another is a funny thing.
- If both of you and your friend have a Robby.
- To pull up and turn around the both of your stand switch on the bottom, and to be in stand type without walking.
- Just put them in front of each other. Press one of their front or back sensor, then they will start talking.
- If they do not talk, just do it once again.
- When the Robby is growing in his third stage of development, he'd got the ability to lead the others. Whenever he meets the Other Robbys, he'll lead them to sing, and even teach the others his recent-learned language.
- They like to talk to others very much. So if both of you and your friend got one or more than one Robbys, please put them together and make them talk by tickling their tummy or press their back sensor.
- If they do not talk, just do it again.
- See how many ways that you can get us to communicate.
- They need to look at each other when talk.
- Please place them facing the other and make sure they are within 2 feet of each other.
- Some mature Robby will teach the younger one with their recent-learned language.
- The older Robby will do some actions first then the younger ones' will follow.
- The younger ones will follow the older ones actions.
- The matured Robby will lead the others to sing.

Robby can communicate with more than one Robby at the same time, in fact any Robby that can see another Robby will be able to communicate.

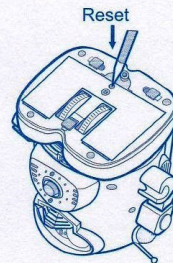

This way a whole bunch of us can communicate at the same time.

The illustration below shows how it works.

11. Re-set

- If something goes wrong with him, you may have to re-set him. If you re-set him, he will do a special dance that let him fix what is wrong. When he is done with the dance, he will be ready to play again. It is important not to re-set him unless necessary.

Remark

- Robby will not either grow up or learn any your language during his getting sick hour.
- You have to take good care of Robby when he get sick, and try to feed him a minimum 10-20 times until he get full and play burping sound, then let him sleep for a while.

Safety Warning

Choking hazard -

Small Parts, Not Suitable for children under 3 years, Adult supervision is recommended when changing batteries, Remove all plastic fasteners and taggers, These are part of the packaging and should be Discarded.
